about

Junior developer with one year of internship experience, I am good with TypeScript and Java.

Passionate about building modern web applications, I am seeking a fullstack, front-end, or back-end role where I can continue growing my skills and contribute to real projects within a dynamic team environment.

skills

Languages

Java, Typescript, Python, HTML, CSS

Frameworks

React, Spring Boot, Django, Angular

Tools

git, Jira, Figma

education

Engineering degree
Network and telecommunication

side projects

Fullstack web projects
April 2025 - Today

Application tracking tool
Online portfolio
Movie database

Gamedev projects
June 2021 - December 2023

Developed a framework to load and integrate mods in games made in Godot
Designed game systems
Built and animated 3D models in Blender

Biking intructor - volunteer
September 2025 - Today

I'm accompanying adult pupils through their bicycle learning journey.
We teach them from the beginning, going through the basics before moving onto more advanced techniques, and then going into everyday situations to tackle safety and traffic rules
